## CXS India

Data is important but insights are more essential. We are committed to gather the data and provide insights to make working and learning better, for individuals, academic institutions and corporate world. We believe that purposeful and happy work conditions are our future and that technology will help us achieve it. We like smart ideas and better ways of doing things. Looking to the needs and utilizing the technologies, we have smart tools where an individual can build up the skill profile to understand skills, abilities and values. So that the human resource would become efficient and smarter to face challenges posed by the changes in the society and economy.

Due to the advancement of times, skills and competences that are required to by the companies have changed and jobs have been changing due to technological advancement and mechanization. To counter those challenges, an individual has to be prepared and act according to the insights obtained. In the future, half of the jobs that we know won't exist or will be handled by automation or artificial

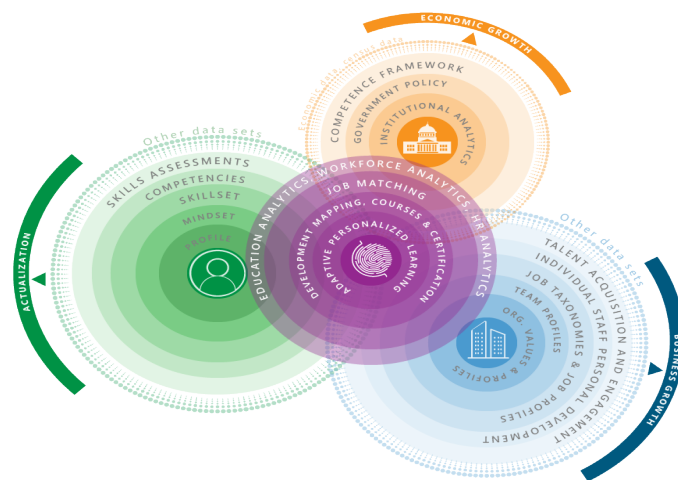

We power human development with education and employability analytics for entire nation.

Our learning analytics cover the full lifelong learning spectrum, from kindergarten to retirement

intelligence. New jobs will be created that don't fit the traditional models and new skills and competences are required to equip new jobs.

## **Xelfer – Know Your Skill (KYS)**

Our solution supports the ecosystem that bridges all levels, from the **individual** to entire **workforces**, using data and research to power **human-centred development**, focused on the needs of the **future workforce**

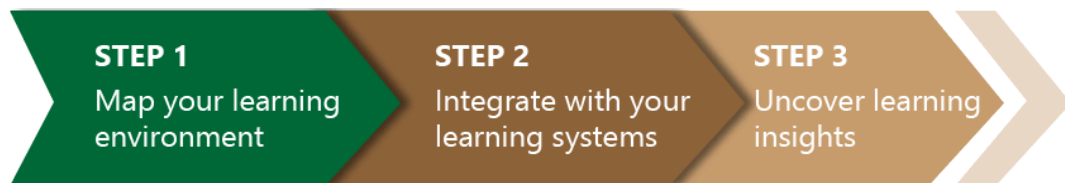

- **FOR EDUCATIONAL INSTITUTIONS – Xelfer** is a diagnostic learning analytics tool that helps the student to understand his/her learning environment using powerful visualization tools, driven by validated research and data. All students will get access to create their own skill profiling, which will be directed to the school administration. Once we have the data, the school management can visualize the learning atmosphere and teacher-student insights.
- **FOR ENTERPRISES - Xelfer** is a holistic profiling solution that shows how individual values, interests and preferences, both at work and outside of work, impact performance. The information will be ready in an individual and organizational level, which will help the organization to structure and restructure the team. Our team map will help the management and decision makers to em/power the team and get their best results.
- **GOVERNMENT – Xelfer** provides national workforce analytics for the digital economy. Our solution can be used to power job matching services, support government policy decision-making, and to bridge the skills gap between education and employability and future workforce skills.

## The C X S Team

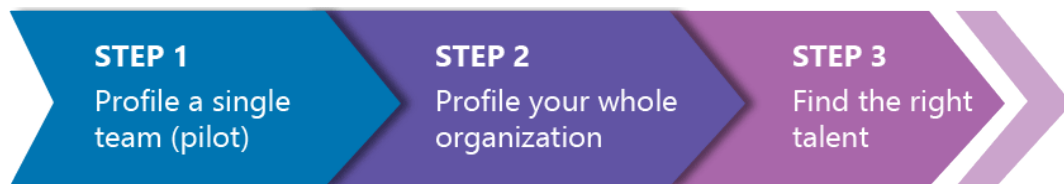

Since 2016, **CXS** has grown into the **only** analytics company in the world with the **full capability** to manage talent development **from education to employability** with a focus on preparing national workforces for the ever-changing demands of the **4<sup>th</sup> Industrial Revolution**.
